

QUAKE JOLTS 20 STATES

Although he can literally unleash and control hurricanes, floods, and earthquakes, influence our space probes, and make UFOs appear at his request, he is not a sorcerer—but the representative of the SIs (Saucer Intelligences) who have bestowed the most incredible power in him so that he could act for them on Earth and prove to the world that they really exist!

THE ME

illustration by David Packman

The weapons are silent, invisible, and many times deadlier than bombs and bullets. For example, there's a "knockout" force capable of dropping people in their tracks at a distance of 2,000 miles; there are "impulses" that can kill plants and birds (and possibly men); and there's "suggestology," the transmission of telepathic commands to large groups of people who obey them blindly and instantly. These are but a few of the fantastic new parapsychological armaments that are being developed—and tested—in ESP laboratories around the world, especially in Russia and Red China. Has WW III started and is the U.S. at this very moment suffering a

PSYCHIC PEARL HARBOR

istration b

One eminent American scientist, who asked to remain anonymous to protect his reputation, stated emphatically: "There are four known forces in the universe—gravitational, electromagnetic, and two nuclear 'binding' forces. If psi force proves real it will be the fifth power in the cosmos and the greatest of them all!"

Unlike all previous wars in the normal and physical world, all the psi-guns pointed *one way*—from the Sino-Soviet Bloc toward the heart—or brain—of the U.S. America doesn't even know yet it's being attacked because it's both an undeclared war and an *undetected* war, so far.

Fortunately, this incredible battle of the mind has barely begun. The enemy has devised the crudest mental weapons; they are theoretical rather than operational. There is time for America to build up a psychic defense for protection, or even retaliation. The enemy, however, is banking on American ignorance of the "occult" to win.

That this weird psi-war is already underway is apparent to those whose minds are open to the existence of paranormal powers. Yet open minds, especially among the authorities, are rare in the Western world. How can people here in materialistic, no-nonsense America believe in simple basic telepathy, let alone mental levitation, astral projection, precognition, psychokinesis, and all the other un-

How to Contact Space People Paperback – Dec 15 1969

by Ted Owens (Author)

3.4 ★★★★★ (15)

See all formats and editions

New Saucerian presents the original version of psychic Ted Owen's "How to Contact Space People!"

Owens, a Native of Virginia, astounded the world with his many predictions, particularly in the field of betting and gambling. He claimed to be able to change the course of hurricanes, tornados, and other tragic events with his mind - and the help of the Space Brothers.

These reprints have been handled with the utmost care, and in some cases are better than the originals (which were hastily printed on small presses).

Description

Ted Owen sits on a couch amongst piles of books and papers. The surface of the couch on either side of him and a coffee table in front of him are filled with stacked and opened publications. Pictures and

posters are propped up on the back ledge of the couch which lean against an ornately patterned wall. The pictures and book covers depict various creatures and alien-like figures. Some of the books are his own authored nonfiction, "How to Contact Space People." Ted is balding and has a very large, fluffy, groomed beard and mustache. He wears a lot of jewelry including multiple necklaces, a large silver cuff bracelet and multiple large rings. He wears a button-down short-sleeved shirt with two pens in his breast pocket. He hovers his outstretched hands over one another and looks at the camera without a smile.

"How to Contact Space People" was published in 1969. Ted Owen was out-spoken about being abducted by alien intelligence who imported knowledge into him which included supernatural powers, such as controlling weather and natural forces.
