

January 2, 1971

TO ALL CONTACTS

You haven't heard from me for some time...not because I've been idle with psi work...but because I've been too broke to buy stamps, paper, envelopes and time...to write all 35 of you. This year...am going to ask you to send me \$10 each to cover the year's expenses of getting my material (magazines, books, letters, etc.) out to you. It's what it will take. (Scientists are excluded from this).

Enclosed is a notarized affidavit from Mr. Conklin in Las Vegas, Nevada. The Si's and I decided to exert psi force on the state of Nevada in November '70. Since Mr. Conklin is my only contact in that state...I notified him, as the self-explanatory affidavit explains. BUT SOMETHING MUST BE ADDED TO THE AFFIDAVIT; to the catastrophes that have hit Nevada and Las Vegas SINCE MY LETTER OF NOTIFICATION TO THAT INTENT, as follows: 12/9/70..."DUST CLOUD FOLLOWED 'NORMAL'N-BLAST"...Mercury, Nevada(AP)..."Baneberry, the code name for the Atomic Energy Commission's 230th announced underground nuclear test here since 1963, went off normally and created a spherical cavern 900 feet below the desert sand. WHAT FOLLOWED FIVE MINUTES LATER FRIDAY WASN'T NORMAL. The AEC said pressure from the blast, equivalent to detonation of about 20,000 tons of TNT, SPEWED RADIOACTIVE DUST FROM THE SHAFT IN WHICH THE NUCLEAR DEVICE HAD BEEN PLACED. A DIRTY BROWN COLUMN OF DUST AROSE AND WITHIN MINUTES REACHED 8,000 FEET. WITHIN HOURS IT SPREAD OVER 1,000 SQUARE MILES..." Later a newsclip said cows' milk in Nevada had been found to be radioactive.

Some time ago I wrote the government, from the Si's...and WARNED the government that the Si's would not stand for any more nuclear test explosions. This horrible accident, above, and the new Si (psi force) attack on Nevada.. plus the killing of Atomic Energy Commissioner Thompson, America's top man in nuclear testing...is the Si answer to the government's ignoring of my letter to them.

Also enclosed is an article about me and my work by Larry Maddry, columnist for the Virginian-Pilot in Norfolk, Virginia. Although it is written tongue-in-cheek style, Maddry knows what I can do. I have given him one heck of a demonstration this past summer (though it was primarily for Otto Binder, Maddry was here on the spot and sweated out the lightning attacks, etc.) It is humorous that he and his family out on the water with his boat named "Lightning" got caught up in one of my furious storms. Ha ha ha!

Now let's talk about pro football, and the use of my mind to control five certain teams so that they could not win the World's Pro Championship this year. By this writing I have eliminated four out of the five, just having held down the Miami Dolphins so that they could be beaten (they're an exceptionally tough, persistent team to beat with psi power...but I've done it). I told Larry Maddry before the season began that I would knock out these teams, and told him specifically that I would cause key injuries to the Jets to take them apart...and when they got into their season this year their entire backfield, Namath, Snell, etc., got wiped out! With injuries. Tomorrow I must attack the Dallas Cowboys with my mind and do my best to beat them. I held them to only 5 points last week...but their opponents, the Lions, didn't score one touchdown...and lost. Remember, my psi force can't pick up the ball and make touchdowns for the opponents. Tomorrow the 49'rs have to do their share of the work...and if they do, the psi power of my mind ~~wix~~ added will crush the Cowboys. If not, I'll get 'em the following week for sure.

(Note: P. 1 was written Saturday. This is now Monday. The Cowboys on yesterday. My PK worked fine...but the 49r QB, Brodie...gave the game away...threw the ball to a Cowboy on his, 49r, 17 yard line and of course the Cowboys went on in. It seemed deliberate; not an accident. He's the best passer in pro football; and I've played football myself, pads and all (had a player killed close to me during a game); anyway Brodie flung this pass straight to the Cowboy, only about 6-8 yards away. The PK cannot help a team that beats itself. It was this gift of 7 points to the Cowboys that was the winning edge. You can't give 7 points to the other team in a championship playoff and hope to win. Now I have only one more chance to stop the Cowboys; in the Superbowl.)

You remember my writing to you...about Lance Rentzel, star on the Cowboys, exposing his genitals to a minor and getting put out of action by the law. Okay. December 15 another star on my "fatal five" list was ~~xxsu~~ put out of action in a weird way. Nate Ramsey, of the Eagles, was on the street when a man walked up to him, pulled out a pistol, said "I'm going to kill you" and shot him right in the chest. No warning. Ramsey's wife said it was "unreal". She couldn't believe it. I'm happy to say Ramsey lived, and is getting well now. But these two cases...are cases in point of how PK stalks and attacks in different ways...not necessarily always on the football field. Several years ago when I was PK'ing the Eagles hot and heavy in Philly, an Eagles player stood up in the Eagle dressing room just after a game...and caught his head on a hook on the wall...and ripped his head wide open. They had to take many many stitches in it. A news reporter printed "the Eagles aren't even safe in their own dressing room". And the reporter was right.

Leonard Tose of the Eagles, Dec. 18, '70, told reporters: "If you know a guy who is capable of winning 10 games here, I'd hire him". Now, he was referring to a coach. BUT I AM CAPABLE OF WINNING 10 GAMES A YEAR FOR THE EAGLES. So...why doesn't he hire me, and keep the coach he has? It's the PK that's beating the Eagles; not the coach.

Okay. Nuff about that. Add confirm to my Nevada PK Project...January 3, 1971, newsclip re Nevada "...tied a record low temperature for Jan. 3 with 11 below zero early Sunday morning.." (Note my mention of radical weather in my Nevada PK "prediction".)

I want to get something on record here. For years I've been studying a phenomenon, and have acquired enough material on it, to substantiate my theory. A PERSON'S NAME...CAN DETERMINE, MAKE, SHAPE THE LIFE OF THAT PERSON! Let me explain. Dick BUT...KUS, of the Chicago Bears team, is famous for hitting and butting people! Charlie WINNER, a pro footb all coach, was hired to coach a pro team because he is a winner! WAR...WICK is the name of another pro football player, rough and tough. He's in a war of sorts constantly. HARDMAN is another pro football player who delights in slamming people just like Butkus does. He's developed into a 'hard man'. Bart STARR became a star...pro football player. Tops. And so on. Just today in a newsclip I noted that the government prosecutor against a man who allegedly committed murder in Saigon while a soldier...is named Capt. John FAIR...LEY. Fairley. His job is to see that justice is done... that things are fair. I could go on and on. But this fact is concrete; name a little boy COWARD, and he'll grow up to either BE an actual coward, or will fight that name subconsciously all his life and go to the other extreme to be a hero in the armed forces or such.

- I want to go a little further with my findings. I've discovered that criminal after criminal...killers, kidnappers, etc., after they've been caught...are found to have messages tatooed on them. "BORN TO LOSE", or a picture of a dagger with blood dripping, things like that. I am convinced that the body of the person so tatooed...acts on these tatooed messages (since all body cells have intelligence), thinking that that person wanted such a future...AND BROUGHT IT TO PASS FOR THAT PERSON!

Here's another case for my "name theory"; Dec. 27, '70, police in Honolulu caught three men for killing a young girl. One of the killers is named... JESSE JAMES Bates! See what I mean?

On the same page of the newspaper is another story, in Baltimore, Maryland... a man killed another man and hacked up the body into pieces. The killer's name? William C. HACKER!

Okay. That covers that. But someday when the brilliant scientists discover that people actually act out in their lives...their own names...remember that PK Man told you first.

Whether you know it or not...I informed the government some years ago that the Si's would reflect MY OWN financial condition and well-being...onto the entire United States! If I am poor, then the Si's will cause the U.S. to be ten times as poor as I am. Please note the condition of the country at this time. And...I am very very poor. Barely making it day by day. Funny...that nobody will believe the Si's.

Also a few years ago the Si's told me to tell the government..."The Si's say how would you (the govt.) like to lose NASA?" Now I quote from an article in the paper by Howard Benedict a few days ago: "Cape Kennedy, Fla.(AP) "After years of success, the United States space program turned sour in 1970...near disaster struck the Apollo 13 mission in April...because of the accident, Apollo 14 was delayed until 1971...the trouble also caused an already-stingy Congress to cut deeper into the budget of the National Aeronautics and Space Administration. As a result, two of the six remaining Apollo moon flights were canceled...many scientists were unhappy...NASA launched only 12 rockets in 1970...three of the 12 shots failed, including the loss in November of a \$98.5 million astronomical observatory (OGO), the most expensive unmanned satellite ever built. Obviously unhappy with the lack of support from Congress, NASA administrator Thomas O. Paine (note that name. Ted.) resigned in September. President Nixon has been unable to find a successor. "We are at the peril point," Paine said of space funding and the loss of competent personnel. Thousands of NASA and contractor workers were laid off as space employment dropped to 145,000 from a peak of 420,000 in 1966."

When oh when, I wonder...will the U.S. Govt. pay attention to what I tell it? How many billions must it lose...how much grief must it endure...until it discovers that giving PK Man the little that he needs to carry out Si orders... would have saved them, the govt., all those billions and all that grief?

-- At this point let me interject here: The Si's are happy that their story is now slowly coming to public notice...Saga magazine, perhaps a book soon, and National Enquirer is getting ready to do a piece...so neither I nor the Si's... will hit the oncoming Apollo shot with lightning or otherwise cripple the shot (sweating out getting the astronauts back as before). No. This shot is "on the Si's" and they'll actually help in every way possible. Anything goes wrong...will be man-made; not Si or PK Man made. They have to help...because although the grid mechanism that was put up over Cape K years ago, a PK psi mechanism, was dismantled...still the PK effects linger on. And the Si's have to help the shot clear these effects.

-- (I hope that you appreciate all this work in this letter. It will take full day to type it to 35 people; make all the copies, etc. What I could do with a secretary and a Xerox!)

Today in the paper...was an article that now the government is concerned with toilets that flush...and waste yea billions of gallons of precious water, now that water is getting scarce. 15 years ago I told my then wife, Pat Owens (now Pat Shannon) that this would come to pass...scarcity of water in time ahead...and I worked out a tiny incinerator set inside a commode...with a tightly-shutting door when a lever is pressed...so that the contents of the commode would incinerate, the human waste, thus negating the need for the sewers, water, etc. But I didn't know how to go about patenting it and all the rest, so I dropped the project.

-- Here is another thing I want on the record: an answer to the mysterious crib deaths that kill so many babies each year. What causes it...are chemicals in the detergents used to launder the sheets on the baby's crib...the baby inhales the toxic chemicals...and since the baby hasn't yet matured enough to overcome the effects of the fumes...it sets up a toxic reaction in the baby which acts like pneumonia and kills it. Probably mostly when it is lying face down...gets it the quickest. I'd like to bet you...that one of these days scientists will confirm that I'm correct!

-- Here's another interesting thing; lately people I've been sending discs to report that UFOs have been seen over their city! Olga Marchant in San Diego sent me newsclips to that effect...AND STRANGE GREEN HUMANOID CREATURES WERE SEEN ON THE STREETS THERE...by police, even! Also Hank Paski just sent me a newsclip that five UFOs were seen over Anchorage, where he lives, by three city policemen, as well as many other people who reported them. They could not have been helicopters; this was checked out. The Air Force reported it had no planes up at that time. The FAA said they'd seen the lights, but that nothing was on radar. The Weather Bureau said conditions were too weak to produce such phenomena. And the newsclip ended with "So until somebody can come up with a good reason, Anchorage might as well keep checking out the skies at about the 2,000-foot level, just in case". (This was from the Anchorage Daily News, Dec. 14, 1970). Both Hank and Olga wear my Si disc around their necks. And yet still another. Phyllis Lynch, Box 538, GPO Bronx, 10451, NY, NY, writes me that she received my disc and put it on, then: "When I first wore the necklace, my little ones and I were on the subway on our way to the uptown Bronx. As I got off the 219th St. Station, I was attracted to a man and a little retarded girl. I was watching her reactions as he was talking to her. As we were walking up 219th St. this man and little girl were looking up towards the sky. Then my children and I looked up. There up there I saw something like three stars and a cloud-like halo (remember the UFO halo seen over Norfolk this past summer? Ted.) around this vehicle hovering over the area. There was no sound because I said to him, gee, I hear no sound up there. He said no you don't. Then after a few minutes it left the scene. Directly after that an airplane appeared and left. I take it that it might have been a flying saucer. It dawned on me then maybe that is what it was." And she was wearing my disc, same as Olga and Hank!

-- Now, before closing...I have something most important to put on record. I awoke about a month ago...and was aware that, as had happened before, the Si's had been teaching me, talking to me, in my sleep. And it was fresh in my mind!

-- (Incidentally, before I forget...if anyone wants to check with Pat Shannon re my prediction 15 years ago (approx.) that water would become precious and scarce...and there would be a need for a commode-incinerator... she lives at 17405 112th NE, Kirkland, Washington. She's a pleasant person, and am sure she will remember and confirm this.)

Back to what the Si's told me in my sleep. We are just at this time making startling discoveries re psi force. As a scientist recently stated, psi force could be the fifth greatest power in the universe! Rissia is far ahead of us. I'm the only human in America with practical experience in using it, and researching it, in action conditions. No doubt about that. I'm not talking about countless dice experiments, now. I'm talking about hitting rockets that are going up with PK mechanisms to make them fall down. I've done that successfully. Even hit one with lightning; documented. I'm talking about guiding hurricanes successfully; even making triple simultaneous hurricanes; I've done that and documented it. No one in the world can even begin to approach what I know about psi force and its usage in actual application. Not even in Russia.

All right. But...Moses brought about such phenomena. So did Ezekial. Both claimed "the Lord" made it happen, and they were human representatives like me. So...it has happened before. And in Egypt...curses were put on tombs...that hundreds or thousands of years later killed those who violated the tombs in odd, weird ways. (Same PK as that I can use...I know it and understand it as if I'd been there at that time). Okay. I wrote the U.S. Govt. a few years ago and WARNED it that if the Egyptian pyramids were flooded (as was the plan) that ancient PK in those pyramids would reach out and destroy those that caused it. Please note...the deadly situation in that area today! Couple of years ago I wrote the big museum in New York, where that Miami burglar broke in so daringly...that if that museum had in fact pieces taken from Egyptian tombs that had been PK'd long long ago...that the PK would react on the area around those pieces! Since I wrote, note what has happened to New York! So many bad things I won't even go into it. If you don't know, you haven't been reading the papers. I.e., PK'd objects (and if they were in those tombs long ago, then removed, they are saturated with destruct-PK) can be taken to far away places...causing chaos and havoc at those far away places! In the other countries where these pieces are taken, the PK'd articles do their deadly work...causing dissension, murder, violence, war...perhaps to the ultimate point of exterminating everyone in that country, because the PK curse is not limited to time or space or mass!

Another point: Ages ago...humans might have used psi force (PK mechs) in our own geographical location (U.S.) Now, PK never dies! That is, the destruct form of psi phenomena simply keeps on growing with time! Suppose one of our cities was the site of an ancient, psi-force war. Today...that city would be dogged by crime, murder, killing, deadly accidents, etc. Even a spot on some highway...long long ago that was a psi-force target...today that spot would be weirdly marked by one auto accident after another.

(I've read of spots just like that). Furthermore, a human being could unwittingly walk through an ancient PK'd area, still existing today only much more powerful now than then...and that human would then be a deadly accident waiting to happen somewhere soon.

Do you know what I mean? If not, write to me and I'll try to clarify it.

-- Psi force...is just like an x-ray superimposed over an area. Invisible, it can't be noted by any human senses. It is entirely probable that animals can sense it being there. The malignant, deadly psi force...even left from ages past...still alive and still growing in power.

Oh, before it skips my mind...have something humorous to tell you. I recently wrote to a professor in a western university...and offered to let the university hire me as a teacher in psychology and parapsychology. (I can flat guarantee you...that I have a thousand times to offer, what the usual prof in psychology and parapsychology has to offer. Because my education and practical experimentation in these fields...has begun where all the others have left off.) The professor wrote back a letter patiently pointing out that I have no academic title or background for teaching such, thus it could not be. But, he added...perhaps I could write about it. I nearly fell off my chair laughing. Think of it! The priceless knowledge which I alone have, with regard to psi phenomena...and wanted to pass on to others in the U.S. My ability as a memory expert, to teach others how to memorize entire books, magazines, tests, facts, etc. My ability as probably the world's best in the field of hypnotism...with the secrets the Si's have given me...to pass on in the classroom to bright pupils. My terrific ability with ESP...PK and precog. and all the rest...which I could pass on to pupils, the know-how and the practical usage. REJECTED. Oh, if I'm lucky I can write it down sometime...that is, when I'm not working yea-hours a day typing on papers to make a buck, with no secretary, no time...to do so. And give it as a gift to humanity. Ha ha. You know something...I'LL JUST KEEP IT ALL TO MYSELF, and that will serve the rest of humanity right! Several years ago I wrote to NASA and warned them...that Russia might be able to attack NASA space flights with psi force, just as I could...and that I would be glad to go down to NASA and give them an educational lecture on just what psi force can do. THEY DIDN'T EVEN ANSWER! Now, of course, it has just come out in that recent Argosy article...what Russia can do with psi force. And what has happened to NASA since I wrote to them...they fully deserve!

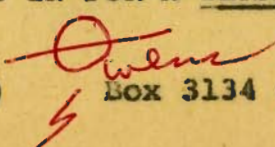

Back to what the Si's told me re psi force, overnight: The "Bermuda Triangle" where planes and ships have vanished...was, long ago, the geographical location of a powerful psi force attack...the most powerful in the earth's history. Since the power was never dissipated...it keeps on attacking ships, planes and people!

The Si's explained that an OBJECT or a PLACE can be PK'd with psi force...deliberately to destroy civilization there hundreds or thousands of years later...since the PK grows and expands in time, space and mass, as time passes. And they say this WAS done long ago, by someone or some thing, that knew what I know today! They said THAT I COULD DO THIS, BRING THIS ABOUT ABOUT MYSELF. (But I know the Si's...they wouldn't consider me a fit instrument of theirs, if I did such a thing. And of course I won't.)

Also want to mention before closing...that consistently, TV sports events, one after another that I'm watching...TV technical difficulties lose the picture, lose the sound. It's either my Si-powered-brain doing it, or the "grid" I placed over Norfolk last summer doing it (although I've since tried to take the grid down. I know very little about removing PK, actually.)

I PREDICT...THAT AMERICA IS IN FOR A TERRIBLE BLOW...within 30 days!

Ted Owens (PK Man)

 Box 3134 CHS, Norfolk, Virginia 23514
