The Si's and I...have just made the fifth flow...of lava on Mt. Etna on Sicily...miss the village it was aimed at. That makes five different times, five different flows of red hot lava...we have made miss...or stop short of... the villages of Santalfio and Fornazzo. Next move...to try and put the volcano out.

VERY IMPORTANT NOTICE!

As of today...the Si's are aiming terrible destructive power...at the war machinery of the various nations on earth employing war and killing. They have determined...to put a stop to our civilization's butchery and killing. The Si's are now declaring war...on war itself.

Their destructive power...the same power as that put into the ancient tombs of Egypt to protect those being buried against intruders...will be aimed as of this date...first and foremost at nuclear weapons and sites and carriers... and this includes silos, subs, ships, weapons and so forth. Includes any nations at all...Russia, China, etc., who are warlike. Therefore it is important that this message go out to other countries, as well as our own.

This destructive power...is now also aimed at germ warfare supplies, any form of war machinery or goods whatsoever...and those manning and maintaining and overseeing them.
Their unseen, invisible powers will strike the governments of warlike nations...which keep and maintain the monstrous machinery which can kill millions, or hundreds of millions, of people. And their power will strike out not only at the weapons themselves, but also at the soldiers, sailors, etc., who maintain and keep these weapons active.

From now on...you can expect to see subs sink, planes crash, battleships catch fire...carriers be crippled...rockets in their silos blow up...and war leaders, or leaders of war countries, be put out of action. Russia, China, any country in the world fitting into the above situation.

The Si's have just drawn a PK line...past which no humans, no country or government must dare set foot. If they do///they will be destroyed, just as a garden must be weeded so that the good plants can survive and flourish. The Si's are determined to bring an age of peace to our world, even if that necessitates "radical surgery".

The Si's have told me to pass on this information...to the highest level... and that is what I am doing now (as well as to my regular contacts.)
