

--May 1975 Special report to Mille (and scientists)

--The Egyptian Report

These are two different reports. There is the true Egyptian Report called the Egyptian Report written January 22, 1976. Lori Rodriguez sent a very clear version to Jeff July 7, 2025 that nearly looks like it is printed out directly from a computer. This is the version I scanned and put it in the Lori Rodriguez box.

There is also the May 1975 Special Report to Mille (and Scientists) that also arrived in the same package July 7, 2025 that is also written about Ted's time in Egypt but is not the true Egyptian Report. Covers some of the same topics but differs. You could actually call it a different version of the Egyptian Report if you wanted to.

Both of these documents have been put in the Lori Rodriguez box.

Now there also is a second identical copy of the The Egyptian Report in the Special Reports/Folders box. But this copy is not extremely clear and looks like the 2nd or 3rd photo copy version so I didn't scan this one.
