August 31, 1972

Dear Dr. Hynek:

Re the recent file I sent to you...documented file whereby I actually "controlled" the city of Cleveland, Ohio, with my mind...for a week (just as I had previously "controlled" an FAA radar installation here on this peninsula with my mind, also documented.)

I'd like to point out to you certain facts which would absolutely indicate that what happened to Cleveland, Ohio, could be no accident, nor a coincidence...not even precognition working. It had to be my mental attack.

First...remember, I sent you a specific list WELL BEFORE Cleveland had its week of horror. This list indicated the different and many things I would DO to Cleveland.

Following which, most of the conditions I had set forth...actually happened to Cleveland. Now, the very VARIETY of things I'd listed...would, or should, I think, preclude "coincidence"...i.e., that the blinding heat, lightning attacks, nutty people phoning up City Hall, and so on...might just happen, as sort of a coincidence.
One of my set conditions might have happened coincidentally, perhaps...but not all the things that happened!

I said I'd cause terrible heat...so Cleveland had heat so hot the sidewalks buckled and fell apart.
I said I'd cause lightning to attack...so lightning hit and set afire a city bus with a load of people on it, and lightning hit various people also.
I said I'd cause people to do strange things...so you saw the newsclip for yourself stating that many people called the City Hall, talking about hearing "strange voices" and "voices from UFO's" and being secret agents, etc.

I can do no better, ever, to prove my reality as half-Si, than these last two demonstrations, Radar and Cleveland.
I said specifically what I was going to do...in advance...and then did it.
In Radar, I had government experts present, and worked on scientific apparatus.
On Cleveland, you and the other scientists were notified well in advance...what I was going to do...before I did it to Cleveland, and it happened.

Tell me, how much more could you want, in the way of absolute, concrete proof...that I am half-Si...that my mind has been altered to produce effects this world has never seen?

In closing...there is no limit...to what I can produce...with my powers. As easily as I can control a radar installation, I can control Cleveland, a huge city. As easily as I can control Cleveland...I could control a State. As easily as I could control a State, I could control a country...even a group of countries. I realize that sounds like a full-blown paranoid statement...but how many paranoids that you know...can produce actual, documented cause & effect miracles to back up their "delusions of grandeur"?

Sincerely,

Ted Owens (PK Man)
