TO MY SIX SCIENTISTS.....

I'd wondered what the government reaction would be...to a dozen planes crashing in the Bay area here, and the Forrestal burning...as a result of my radar demonstration.

In the past year, ~~XXXXXX~~ as now, they had two alternatives to PK Man...(1) take me and family, subsidize us so I could carry out Si demonstrations and work FOR the U.S.,
or simply destroy me, the only, repeat ONLY, human link between the UFO entities and the human race.

Well, yesterday I got my answer. The Internal Revenue Service contacted me at my home...their man came here (and remember, this is a tiny, teensy place, six blocks by six blocks IS the town, isolated on the tip of the peninsula)... and asked enough key questions to make the FBI blue with envy. I can only assume they are preparing a case against me, to clobber me.
They clobbered me last year...when I didn't have two dollars to rub together... by notifying me I owed $300 on the previous year's income tax. Where they got that I'll never know! They were completely wrong...but I can't fight City Hall, economically, anyway...so I went to the little bank here and borrowed $300 and paid it.

Yesterday he wanted to know how I made it without having a job. I explained that a friend, George Delavan, had made it possible...by loaning me a hundred or two hundred now and then...until I make a deal with a pro football team. Also, of course, some people send me a few dollars as a donation to my work...in order to get a disc. And that's it. All of it.

So the impression that I get is...the government is winding up to destroy me via the income tax route, like they would a member of Mafia or the Syndicate. If they do...it will be a frame...but I've been framed before, in Fort Worth, Texas...and you'd better believe it!
If the government tells me now I owe yee hundred dollars in income tax (although I've been unable to find a job and haven't worked) then I am sunk. I have about a hundred dollars, and that is it.

So if suddenly you stop hearing from me...then you know the government agencies have destroyed me...one way or the other...and I've gone as far asI can go. I'll have no car or possessions, no money...and my family and I will be trying to get somewhere else from here, to start over.

Mebbe that's what the government is after...to get me out of the Chesapeake Bay area...where all the planes have crashed.
Well, frankly, I know it would be a terrible error on the part of the government. Because the Si's will retaliate, in their own, inimitable, terrible way! And in proportion to the damage done to me and mine. By now, I do know the Si's, and how they think and reason.
Their human representative can be clobbered, true. But...<u>God help those that do the clobbering!</u>

Ted Owens (PK Man)
