Drs. Putoff and Targ:

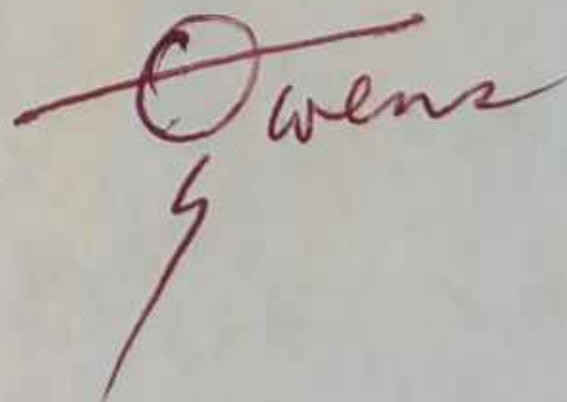

When I tried to remove the glued article from the permanent notebook, it began to tear...so had to give it up. (Re the NASA team sent into Bahamas that found the UFO base.) Next time I see you, if ever...will bring it along.

George Texeira called re the mixup...I was prepared to stay a week or two if you wished...for experimentation. That is, if you gave me the word on it. At our lunch, I explained I was ^{tentatively} leaving in two days...and Dr. Putoff said he'd call the following day with a yea or nea on the experimentation. He did not call at all...therefore I presumed you were no longer interested...and departed the area.

After returning, George called and said you'd expected to put together something. Guess we had a poor rapport...or something.

Am leaving for France on the 27th...hope to get together with some scientists there, and perhaps do something interesting. Am very short on finances, though...so will not be able to stay more than a week or two there.

Dear George:

Booey on the mail cover and phone tap. Am just going to go ahead and tell you what's up, regardless. Just hope "they" (govt.) doesn't block my going.

This woman in Frisco I just trained, in chatting with me...learned that the SI's wanted me to go to an old, isolated castle in Europe...for a face to face meeting...to work out arrangements for communications face to face with humans...to try and help humans save themselves from themselves.

To my utter astonishment...the woman, illie, told me she'd had a savings account for ten years...an extra one that she didn't need...which would be just enough to get me over to France for a shot at the SI's castle plan. Naturally I leaped at it...and have already made boat arrangements.

Trouble is...the SI's stipulated that I do the Castle Plan in England, France and Germany (they wanted three different geographical locations; presumably so that if govt. is slyly involved in surveilling me...they can circumvent govt.) And to get to England after France, then to Germany... I would need some thousands more, 3 or 5. I figure, as long as I am going over there...might as well try to do it right, right? But...there's no way with the money she gave me. Just enough to get over there, stay perhaps a week, then return. Hell, the entire human race should supply me with an unlimited amount of money to get this thing done right...spend a full month in France, at the old castle...then a month in England, at the castle...then a month in Germany, at the castle. Then...we;d have some answers. But...the whole human race isn't helping. Just you, to survive; and Millie's boat passage.

Today wrote to Dr. Claude Pöher in France, famous scientist...told him I was coming over...and just baldly asked him to give me a hand. But doubt if he will... Funny...possibly the fate of the human race could depend on this Castle Plan; yet I haven't the funds to do the job correctly, while there.

Well, at least the SI's know that two humans, you and illie...are doing your best! You with survival of PK Man; Millie with boat passage.

Ted
