

January 25, 1978

Dear Jeffrey:

Two personable, most intelligent young men in their 20's...have come forth here in Albuquerque...and offered to attempt to get the necessary funds for the SI base...

What they propose is that they establish a non-profit organization and raise funds in my name...by placing ads in better newspapers in key cities; possibly using other means. Enclosed is a sample letter of intent that they have worked up. They wish me to give them my personal authorization in writing for them to proceed.

Their names are Fred Williams and Stephen Tucker.

They are willing to work in cooperation with you, in any way.

For information re this matter, contact Fred Williams, area 505, 344-5818, Albuquerque.

Cordially,

Ted Owens (PK Man)

Owens

*The enclosed plan
is only tentative; they
request your help in
re-working the plan.
Trouble is, such a plan
would tie me up with
strings I abhor and
can't have... plus
there is no time, as
I've explained.*

ARTICLES OF INCORPORATION AND BYLAWS

TED OWENS FUND

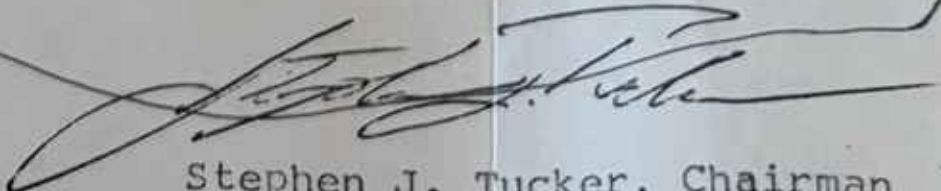

January 24, 1978

To whom it may concern:

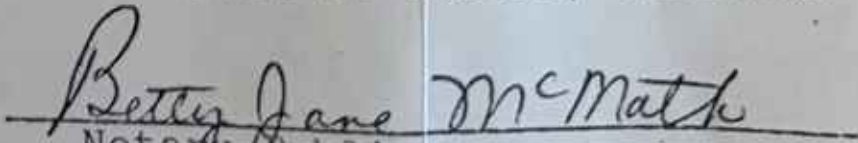

The objectives of the TED OWENS FUND are non-profit and educational: to ^{1200. fin. support} establish a UFO contact base ¹ and ~~to provide~~ financial support ~~for~~ scientific inquiry into causes of UFO phenomena.

deadline in dispute JW
Based on voluminous documentation by reliable witnesses from affidavit files collected over the past 12 years and the recent preliminary scientific report on the Owens case by Jeff ~~rey~~ Mishlove of the University of California at Berkeley, it is resolved that none of the contributions will be allocated until a total sum of \$250,000 is accumulated. If that sum is not accumulated within two years, all contributions will be returned to their original donors at that time, January 24, 1980.

If the amount mentioned above is not collected, the TED OWENS FUND will officially dissolve itself on the same date. If the amount mentioned above is collected before that date, a detailed breakdown of all expenditures will be available on request within 30 days of the attainment of said sum. Donors will retain the right to inquire about the size attained by the fund at any time within the two year period if they send a self-addressed, self-stamped envelope to the TED OWENS FUND along with their inquiries.

Stephen J. Tucker, Chairman

My commission expires 6/11/79

Betty Jane McMath
Notary Public

January 25, 1978

Dear Jeffrey:

As you know, this area has one of the largest military and intelligence complexes in the United States... Los Alamos, Kirtland Air Force Base, Sandia Laboratories, etc. And, according to Dr. Henry Monteith... they all hate me with a purple passion. They have insulted me and ridiculed me... via Henry Monteith; he their front man and spokesman in his visits to my home.

Lo and behold... two young men in their twenties have mysteriously come from literally nowhere... Fred Williams and Stephen Tucker, offering o to gather the monies together to get my Oregon base. I ask myself, with so much hate pointed at me from the local military and intelligence... can any possible good come from this tender, sensitive area. I have to answer myself no.

Fred Williams is a tall, ~~brxxx~~ dark haired boy, 24 years old... who has admittedly worked as an intelligence agent in the past. He also worked at Kirtland AFB. He has an enormous IQ, it seems... can converse at great length on weighty points of physics and science; says that his dad is a scientist, who has his own lab. His wife is a nut who, last week, drew up some kind of affidavit saying she'd kill herself... on and on. Fred is also a jazz musician, playing numerous instruments. He dresses like a door to door salesman, and acts like one, also. Wears blue suede shoes. Very glib; very smart. *also a jazz musician... drums;* Stephen acts a trifle gay; Fred today said Stephen lives with he and his wife. Figure that one out. Stephen also makes noises like a psychic. Stephen says he is unemployed; has been for some time; and for the last two months has been trying to "get his head together." Fred wants to set up a non-profit organization in my name; make Stephen the head of it, and the handler of the monies coming in. Today they both came over and handed me the enclosed laughable, funny document to sign.

I hadn't the heart to just laugh and tell them to get lost. (Fred said he didn't want any percentage of the monies, or financial payment. All he wants is for Stephen to collect the monies for two years until the full amount is collected, then hand it over to me for the Oregon base. And if it isn't collected in full... then send the monies back to the contributors, all 250,000 of them.) That's right. Fred said they planned to run ads in all big newspapers in principal cities of the U.S. asking for \$1 contribution from 250,000 people. I asked him today how, if he hadn't the money, and Stephen was broke... they could lay out all the money necessary to pursue the matter.

I told them I could not, would not, make a move without consulting you. Am sure it would certainly be best if you can gently close them off. Fred took your phone number to call you. They were pressuring me today for a fast authorization, written, from me, for them to represent me. Sounds horribly like either a con game; or someone setting me up for some nastiness. They stood over me while I typed out the enclosed stuff. So couldn't add this then. I'll mail this tomorrow, with the enclosed. It is interesting that Fred is the expert on all of this fund-raising and organization; Stephen knows nothing about it, he told me... yet Fred wants to put Stephen in as "head" of it all. Ha ha. Oh, phooey. You know, I am a natural target for con men to reap a harvest at my expense. These might just be the first ones. Best to you....

SIs have given me the date for time window
at haunted place. Have been instructed to return
there this coming July 17 to July 22 or 23.
All-night camping sessions... no sleep, just stand
& watch & be alert. Only my brain can turn it on.
If no base set up by them, forget it. Their rules, not mine. Ted.

FROM THE DESK OF
Mr. Ted Owens (PK MAN)

Jan. 5, 1978

Dear Jeffrey: Of course, you were right last night...when I exploded with anger because Louie didn't come up with the true facts, and guessed that the SIs would do something negative in retaliation. You were right. They won't. They are not petty. However, can you understand my frame of mind? Already one key person, Hynek, had denied to you an absolute fact...denied or said he couldn't remember my long distance call to him before the Apollo flight. That's one. Then another key person, Louie, gives a totally inaccurate version of what happened. That's two, and was the straw that broke the camel's back! See, the Rhines had been having me over to their house, secretly, to test my qualities as a spirit medium. They did that several times, then the next time I showed up for the mediumship go-round Dr. Rhine surprised me by placing the small group in chairs about ten feet from a table. He, Dr. Rhine, then set up a pair of scissors (about six inches long) securely against some objects on the table...told me that the scissors were secure...and explained that I must make the scissors "fall over" with my mind. I tried for an hour, every way I could think of, then gave up, stood up, said "Dr. Rhine, I'm sorry, but I've tried everything..." at which moment the scissors ~~FIXED~~ flew high into the air toward our group then fell onto the floor. Later I asked for and got a written confirmation of the event from Louie, and kept it for years glued into a notebook that I carried around. Until it and many other papers I had were lost in a family move from Phila. Well, the weight of years of frustration lies on me, Jeffrey...so when the second of two scientists refused to divulge absolutely true facts, it was too much for me. Anyway, stay cool...there won't be any catastrophes over that. Incidentally, someone tried to get through our front door last night.

* That's the second break - in episode in several weeks.

Police amazed Bean & I by getting out to us in about 2 minutes.

Jan. 30, 1978

George Delavan
Millie Miller
Jeffrey Mishlove
Dr. Henry Monteith

Dr. Max Fogel
Dr. Milan Ryzl
Peter Maddock
Dr. Leo Sprinkle
Drs. Targ and Puthoff

Gentlemen, and lady Millie:

Last July 19, 1977, my son Beau and I witnessed three bigfoot creatures and 28 UFOs just overhead...in northern California in an isolated location...in one single night. Since then it has been my understanding that ~~we were~~ enabled to look through a "time window" into another dimension, that of the SIs, UFO entities for whom I had worked for ten years. One giant UFO, probably as large as a football field, was within a rock's throw of me that night.

All right. The SIs (my UFO connection) have informed me that, if I get my Oregon base before this coming July, 1978...then each one of you are invited to join me, and my son Beau, ~~xx~~ to return once more to "the haunted place" as Beau and I call it, where you should be able to see through the time window and witness the many forms of UFOs overhead and perhaps also the bigfoot creatures some 30 feet away ~~also~~.

The SIs have instructed me to bring my guests next July 17 to July 25. We will sleep in the daytime; stay up all night long, every night...until "the" night, when they will appear for us. Of course, the happening will be priceless for each of you...because you will see into another world, as Beau and I did last year.

I hope sincerely that the SIs are not telling me wrong; but then, they never have yet, through hundreds of 'miracles' in which I have participated...so I trust them implicitly.

There are rules. If our secret place is bugged, or any in the party is wired for sound...or there is ANY contact between our party members and outsiders...then the SIs will not open the time window, and they will not appear. Thus I would warn the CIA and other government agencies to keep far far away from this operation, if true results are to take place. Another rule...NO ONE is to fire a gun or attack in any way the UFOs that appear. Or the Bigfoot creatures. This is a friendly meeting.

Any of you attending...can expect to be "taken" by the SIs...hypnotized; examined, programmed, whatever, with resultant amnesia. This can happen, and you should know it. But it will not be done in a hostile manner, nor in a way to injure or harm you. Needless to say, this happening will not be for the fainthearted.

This letter may be a bit premature; I do not yet have my Oregon base...but the SIs told me to tell you of all this, in advance of the fact. And to invite each one of you to the gathering. If they appear as they did last July, to Beau and I..."Close Encounters" movie will seem like a cub scout meeting.

Sincerely,

Ted Owens (PK Man)

Jan. 30, 1978

Jeffrey...

a very dangerous situation has arisen here. Puts the focus on the SI anger because my family and myself are not protected in my "host country."

As you know, my wife Martha recently returned to us. How she escaped, I do not know. She'd gone to Richmond, Virginia, on her own...and we came here. Then she rejoined us, after about six months. And she told us an eerie story. (Remember that Martha is one of the sweetest persons in the world...but sometime, somewhere, she had brain damage...and she is simple and naive.)

She told us that a strange man had picked her up in a park...then beaten her and raped her, and threatened her life. Further, he forced her to use marijuana and hashish. Finally, she managed to get away from him (he intercepted my letters to her and tore them up...but she found the empty envelopes...and he intercepted my phone calls to her and cut them off.)

Meanwhile, I had called the police in Richmond and asked them to investigate. They did, most kindly. (See enclosed file.)

Now, I have been getting threatening phone calls here from nuts in Albuquerque...harrassing phone calls daily (10 to 20 sometimes)...and now have this added threat of this crazy dope addict from Virginia!

What is ironical is...Martha does not give me sex or love or affection, what a man would get normally from a wife. She is just one of the sweetest persons in the world...and my two little kids love her dearly. I do, too.

Am sending you this information because you are following me closely, my life, and you should have it, to keep the file complete. PLEASE RETURN THE ENCLOSED PHOTOGRAPH OF JAY WILLIAMS BY RETURN MAIL SO THAT I WILL BE ABLE TO IDENTIFY HIM IF HE TURNS UP AT THE POST OFFICE! Also the police letter. And his letter, too.

The SIs were right...someone, somewhere, should have set me up with a safe Base in the Oregon mountains, quite a while ago...with two trained guard dogs. Here I am, open and vulnerable...making a shootout eventually a solid fact. And I do not want a shootout...though am a crackshot, a quickdraw expert, and an expert knifeman, plus a fine judo man and a pro boxer. But I do not want to hurt anyone. It seems that it is being forced upon me (by the OI's?) Many times in the past I have been jumped by gunmen and knifemen, in gangs...but beat them in my own way, which is why I am still here. But the odds are creeping up on me. Figure out... what will happen to the United States...if the odds beat me.

Sincerely,

Ted Owens (PK Man)

Owens

Tonight she told me he also made her sniff cocaine.

Re: A psycho attacker on dope!

Jan. 30, 1978

Jay Williams, [REDACTED]

My wife, Martha, has returned to her family. She wants no part of you.

She has told me and the kids...how you picked her up in a park; beat her, raped her, forced marijuana and hashish on her...then, when she threatened to call the police and tried to get away from you...you threatened to use your gun and kill the police, there in Richmond, Virginia.

Now you threaten to come out here to New Mexico and do some killing, in your letter, which I have.

You are obviously crazy. A psycho. And this is the very best advice I can give you.

Stay far, far away from me and Martha. If I get my hands on you, after what you did to my wife...I will break both your arms and both of your legs...calmly, and without feeling. If you try to use a gun on me or my family...then you will ~~no longer~~ cease to exist.

Perhaps that is what you want.

Sincerely,

Ted Owens

Dear Jeffrey...was charming talking to Lynn on your line...and enjoyable talking to you. She seems to be a dear. I still am completely puzzled as to how I could collaborate with her re PK, despite your attempted explanation. Anyway, it could not conceivably be done before I do my "base" work in Oregon; certainly my base work could not be done from Frisco, as she suggested. If I get the base, she would be most welcome to come there and I would be most glad to collaborate with her...whilst I did the SIS work, simultaneously...if her work did not detract from the SIS work.

Got her letter. Most interesting. The envelope of hers...was 10¢ short on postage...four stamps, all upside down and sideways...and the zip code was backward...she put 47008 and it is 87004. Well, Einstein couldn't find his parked car, either.

She enclosed a photo slide. Wow...what a broad! Lovely, beautiful. (Unless 70 years ago).

Hope you please you will in the I do something as she both And try it.

Enclosed 30 aer 67s. parti forme

She enclosed a photo slide. Wow...what a broad! Lovely, beautiful. (Unless it was made 30 years ago).

Hope you send soon the "expanded" scientific report to me! Also, please be kind and send a copy to Millie, even though you once angered you with a wrong remark. She's sweet, Jeffrey...and her help to me in the past has been absolutely priceless...to the SIS, as well as to me. I do wish that you would make it a point to get together with her sometime...have lunch at the Fishermen's Wharf or whatever they call it, as she and I did...and get to know each other. Then...then...you will both appreciate each other. She's something else, Jeffrey...as you are. And two "something elses" should get together! You would never lose by it.

Enclosed is last week's card from Roland Swank...the chap who headed 30 aerospace scientists in following my work in hurricanes in the late 67s. Why not call him and ~~query~~ ⁹⁵⁴⁰³ him about it? Hurricane Inez, in particular, talk about! (Note that the very MASS of witnesses to my former phenomenon...seems to comprise a phenomenon in itself!)

Also...you should phone Murray Zatman, 100 Santa Rosa Avenue, Santa Rosa, California (his wife, Mari)...Murray was my boss in the late 67s during three years where I was controlling hurricanes, bringing in storms over Phila., controlling the Phila. Eagles, making the massive '67 power blackout, etc. (The 1965 massive power blackout in New York... I had sent a telegram 10 days previously to the government, warning them. Have it in my files.) Anyway, in all these old files which you do not have...are many affidavits from Murray Zatman, lawyer, as well as other lawyers. If he tells you true...and has not been "reached" a la the Cape Charles radar expert...he'll make your hair stand on end!

All for now. Keep swinging.....

Sincerely,

PS... note I told George
W. that SIS would get

Thursday, 1/12/78

Dear Jeffrey:

I'm enclosing a copy of the letter I received today from Ted Owens. It is confusing to me especially so since I just recently had a quite complete check-up at the Marshfield Clinic and got a fairly gleam "bill of health". Now I don't know what to do. Marshfield is considered as good (maybe even better) than Mayo's.

As for the building — I am already doing most of what he suggests. How about your friend he mentions? Is there any chance there?

Call or write soon.

Love

Dad
Also — Ted mentions \$800,000.
It is 650,000.

I would be greatly honored... if scientists,
etc., in the future, could refer to "my" phenomena
as "The Owens Effect" just as they refer
now to the "Beller Effect."

Ted.

FROM THE DESK OF
Mr. Ted Owens (PK MAN)

Jan. 3, 1977

Dear Hy...I enjoyed talking with you over the phone. Just received your package, and photos. Frankly, my friend...I am more concerned about your health, than I am about your business. Am rather famous for doing psychic 'readings' on photos...and the impression that I get from your photos...is that you had better get to Mayo Clinic, if you can...and get a thorough scan on your health. I went to Mayo several years ago...and they do a dam good job for you. It is worth every penny, to you.

Meanwhile, let us see if we can do something about causing some cash flow to come your way. Attached is a personal disc for you to keep on your person, AND UNDER YOUR PILLOW AT NIGHT. On the separate sheet find three more discs, coded with powers from UFO friends...scotch tape these three discs somewhere inside the building that you want to unload. (Gives the SIS (UFOs) a directional find.) Then we wait, while you throw out classified ads and perhaps buy a mailing list and send a form out to good leads on the building. And remind Jeffrey that he has a friend whom I met in Frisco...who buys buildings like yours and sells them! (He drives a specially made car...a Jensen Interceptor.) Maybe he would be interested. Also...buy a mailing list and throw out leads to the Chicago and Evanston area. Also, why not keep in mind and consider a swap, a trade...for your building for something more interesting and better for you! I wear a disc...but my SIS still expect me to keep swinging...they cannot pull a tooth, remove an infected appendix, or supply cold cash...cause they do not use money. Certain things we still have to do for ourselves. But they will use their strange powers to help you and I. Bye for now.....

your new friend, Ted Owens

I have asked my UFO connection

to help you, Hy...and your

entire family. Showed them by

telepath your building, \$800,000 price you

want, and map. Plus your photos

Jan. 9, 1978

Dear Jeffrey...if you'd like some dynamic illumination on what I can do...write or call Zatman...a lawyer who lives now in California...I worked for him as a legal secretary in the late 60's...have many affidavits from him...and informed him BEFORE I caused the massive five-state power blackout on the east coast in 1967. I actually made a hurricane for him; before he went on a vacation I told him I would. It appeared on schedule where I said it would. After I'd done a whole bunch of miracles that he was privy to...he called me in and said,

Mondale's Visit Won't Mend Many Trampled Fences

Jeffrey
1/8/78

Fence mending Vice President Walter Mondale barnstorms in Albuquerque tomorrow evening and Tuesday morning but his schedule doesn't leave much time to lessen growing western resentment about the administration or to provide local Democrats with inspiration for the 1978 campaigns. If the trip isn't more substantive than the preliminary agenda indicates, it likely will have about as much impact as President Carter's just-ended seven-nation junket.

The vice president plans to meet with Gov. Jerry Apodaca and a few others Monday evening and then will breakfast with Indian leaders Tuesday morning, tour Sandia Laboratories and minority businesses and then participate in a round table discussion on urban issues with Mayor David Rusk.

Nowhere on the preliminary agenda is there mention of the four problems troubling the West, including New Mexico, the most: water, energy, growth and agriculture.

Each of those problems is closely interrelated although there seems to be little understanding of that fact by the White House. It is clear President Carter, who is giving the problems short shrift, doesn't understand the role of water in the West.

That lack of understanding was evident during the 1976 New Hampshire primary when Carter said he believed enough dams had been built in this country and that he would be reluctant to build any more dams if he was elected president.

Not long after his election, Carter moved to strike 19 dams, river channelization and irrigation projects from the budget. He expected to save \$5.1 billion. The action was announced without consultation with either the governors or congressional delegations of the affected states, most of them in the West. Congressmen were incensed and called the action naive, arbitrary and illegal.

Later, President Carter announced plans for a comprehensive reform of the nation's water resources policy. He also urged the Dept. of Interior to develop regulations to enforce a long-ignored 1902 law which limits the amount of land a farmer can irrigate with water from a federally subsidized dam to 160 acres, a farm size which western farmers say cannot be operated economically. That farm size might have made sense when the plowing was done with horses, but it certainly bears little relation to modern-day farming methods and equipment.

The Dept. of Interior has delayed for the time being implementation of such irrigation regulations until it can complete environmental impact studies. The 1902 law affects only the arid 17 western states.

But that isn't all. The White House plans to deliver a final water policy proposal in February, a comprehensive reform of the nation's water resources policy. Westerners see the proposal as a move by Washington to usurp traditional state control of water rights.

Westerners fear that irrigation and recreational water will be diverted to benefit energy resource development. Their water rights and policies have been developed

through years of law and litigation and they are willing to fight to protect those rights.

The President's dam and irrigation projects position raises the dander of westerners whose lives, homes, livelihood, communities and recreation all depend upon somewhat uncertain water supplies. Dams hold the winter snow runoff and water from gullywashers that otherwise would be lost to any beneficial use. And like it or not, those dams silt in after a few years and must be replaced with new dams at less satisfactory sites.

The rush to develop more energy sources is creating other problems, many water-related, that Washington seems determined to ignore. Development of those sources, of course, demands more water, not only for processing but for the workers such developments require. Realistically, there are limits on the water available although more could probably be captured than is now if the necessary structures were available.

But the administration does not seem interested in assuring development of those water resources. Furthermore, the administration seems even less interested in providing help for communities which are or will become boom towns because of energy development. The day when miners were willing to throw up a tent, dig a latrine and wash in an icy stream has long gone. States and communities often lack the necessary funds for additional modern services.

Carter's water policies are the jokers in the West's survival deck. If adopted, and carried out, the policies could greatly hamper development of the West's energy

resources, which the rest of the nation want. Those same policies could lead to the destruction of the West's agriculture, which helps feed a large part of the rest of the nation.

The administration's policies toward the West seem to overlook the social and economic costs that are being imposed by exploitation of the region's vast uranium, coal, oil, gas and shale deposits. It almost seems that the administration wants the West to subsidize national energy development to benefit the more populous areas and to the extreme detriment of westerners. The administration isn't even offering federal help for the new schools, the roads, sewers, police and fire protection and other costs such energy development requires.

Mending the political fences which fell during the 1976 presidential election campaign will require substantially more than vice presidential visits or presidential appointments of state residents to high Washington posts.

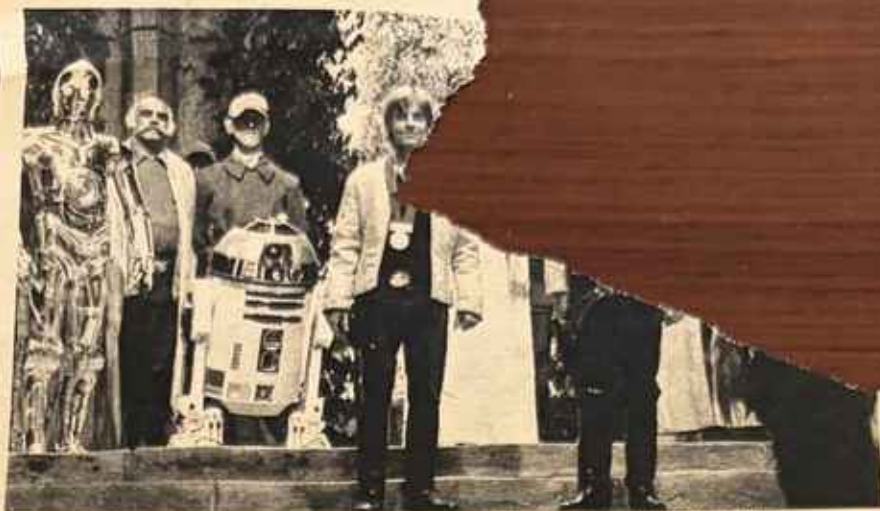

New Mexico has had what others regard as more than its share of appointments made by President Carter. Two of them, John O'Leary, deputy secretary of energy, and Alex Mercure, assistant secretary of agriculture, are directly involved in matters of the utmost concern to New Mexicans and all westerners.

Trouble is, Washington just isn't listening to the West.

The writer is editorial page editor of the Albuquerque Journal.

"STAR WARS" HEROES SPORT MEDALS IN THE HIT MOVIE'S FINAL SCENE

SCIENCE FICTION GLUT

Inspired by the success of "Star Wars," a potential \$200 million money-maker, film producers are planning a wave of space age films. Almost 20 science fiction film projects have been announced for future production.

In an effort to board the "Star Wars" train, some studios have even tried to re-release old science fiction thrillers. Paramount, owned by Gulf & Western, recently re-released two classics made in the 1950's: "The War of the Worlds" and "When Worlds Collide." Both died at the box office because

they have been shown countless times on television.

George Pal, who originally produced both films and is a veteran on "special effects" pictures, is working on a new one, "The Time Machine No. 2," a sequel to his 1960 hit, which he expects to bring in at \$2 million--a far cry from "Close Encounters of the Third Kind," which cost \$20 million.

Director George Lucas, who made in England the fabulously successful "Star Wars" for \$10 million and sold 40% of his interest to 20th Century-Fox, hopes to do a sequel. This time he plans to sell 20th only 10% of the film.

REVIVAL OF 1951 SCI-FI FILM "WHEN WORLDS COLLIDE" FIZZLED

Carter Was Uninspiring

President Carter's first State of the Union message was disappointing — to Democrats even more so than to Republicans, to the total American constituency as well as to the Congress to whom his remarks were addressed.

In overall tone it was insipid, and in most respects it sounded apologetic. Yet in no respect was it conciliatory to a Congress that has treated his initiatives dubiously during his first year in the presidency. At no point was there the faintest suggestion of compromise. Although his words were not backed up by an affirmative tone, he actually nettled a Congress under the control of his own party with the chiding comment that "on energy legislation we have failed the American people."

Jeffrey... perhaps the below is overstated... I told you richy the same thing... "inspiring" instead of "insipid" washy... Ted

change "apologetic" to my "weak" Ted

11/19/78

Jeffrey... Kirtland AFB,
Sandia Lab & Los Alamos
are doing their best to
insult me, ridicule me
and show me disrespect.
However, I have, after
some reflection, decided
~~that~~ not to waste my
time or energy on Los
Alamos. Have contacted
the SI's and asked
them to punish Los Al.
Best to you,

Ted Owens

1 from phone call from
Henry Monteth, 1/18/78

ets Who Have Insulted Me.....

"the UFO Connection"...am going to teach
will never forget.

Show me disrespect.

a controlling cities, towns and countries...
give me and my UFO connection too much trouble
esson in manners.

Dr. Henry Monteith mentioned to me last week
tists might be interested in my speaking to them.
e...because previously Henry had had trouble
general in this area...for an appearance by myself
arge a \$1,000 fee for my appearance before your
se, was the equivalent of my sticking my tongue
use Billy Carter charges \$5,000 to speak before
y what I would have to tell you...would be like
e swine. To me, anyway.

be lucky if we paid for his gas to get here."

All right. Fair enough.

So your inference is that what I have to say is nothing. My
intelligence, to you, is worthless. My experience to you, is ~~worthless~~
worthless. I have no "clout or punch."

Ha ha ha! How you have misjudged me, and my UFO Connection.

As of this date, I have no Oregon Base...so what I do, and the UFOs
do...at this point in time...is permissible. (Once I get my Base,
I am tied to absolutely constructive, not destructive, projects.)

Now, you jerks...(I am not a scientist...so I can talk straight)...
I am going to teach you a lesson in manners that you will NEVER
forget.

For five (5) years...this is what is going to happen to your Los
Alamos setup. (And I have my UFOs permission on this.)

Your air space will be deadly. I myself certainly wouldn't want
to be in an airplane in your area.

EM effects (electromagnetic) will attack your area, and your
experiments.

Poltergeist effects will inundate your area...disrupting what you
are doing and giving you fits there.

Bad weather, storms, drought, hurricane winds, tornadoes, will strike
your ~~xxx~~ area.

UFOs will appear...over and in your area...and will be hostile to ~~you~~
you. And weird, freaky things will happen there at Los Alamos...
and your personnel will do weird, freaky things.

This isn't anything that I wanted, or planned. It has stemmed from
a phone call where Dr. Monteith told me that you insulted me.
That is all that it takes. In time to come, you will come to
respect me, and my UFO connection.

(OK Man)

To Los Alamos Scientists Who Have Insulted Me.....

I, Ted Owens, PK Man, "the UFO Connection"...am going to teach you a lesson that ^{from phone call from Henry tonight, 1/18/78} you will never forget.

Not to insult me. To Show me disrespect.

I have spent ten years controlling cities, towns and countries... I reckon it will not give me and my UFO connection too much trouble to teach you all a lesson in manners.

Briefly...to sum up...Dr. Henry Monteith mentioned to me last week that Los Alamos scientists might be interested in my speaking to them. This was amusing to me...because previously Henry had had trouble in getting \$20 from a general in this area...for an appearance by myself. So I told Henry to charge a \$1,000 fee for my appearance before your bunch. This, of course, was the equivalent of my sticking my tongue out at you-all...because Billy Carter charges \$5,000 to speak before groups...and naturally what I would have to tell you...would be like throwing pearls before swine. To me, anyway.

Your answer was: "He'd be lucky if we paid for his gas to get here." All right. Fair enough.

So your inference is that what I have to say is nothing. My intelligence, to you, is worthless. My experience to you, is ~~worthless~~ worthless. I have no "clout or punch."

Ha ha ha! How you have misjudged me, and my UFO Connection.

As of this date, I have no Oregon Base...so what I do, and the UFOs do...at this point in time...is permissible. (Once I get my Base, I am tied to absolutely constructive, not destructive, projects.)

Now, you jerks...(I am not a scientist...so I can talk straight)... I am going to teach you a lesson in manners that you will NEVER forget.

For five (5) years...this is what is going to happen to your Los Alamos setup. (And I have my UFOs permission on this.)

Your air space will be deadly. I myself certainly wouldn't want to be in an airplane in your area.

EM effects (electromagnetic) will attack your area, and your experiments.

Poltergeist effects will inundate your area...disrupting what you are doing and giving you fits there.

June 14, 1977

Mr. Andrew Wilson
Truth Research Foundation
Thornhill
Newton Mearns
Renfrewshire, Scotland

Dear Mr. Wilson:

I am prepared to cause exciting phenomena to occur over and around London... and other parts of England...from the middle of August clear through the month of September. Namely, the appearance of UFOs and perhaps UFO creatures or humanoids; (multiple appearances); great power failures; electro-magnetic and magnetic anomalies; electrical storms and great winds; other weird and strange events.

It was a great honor for me to appear before the Parascience Conference last year in London...and address some excellent scientific minds present at that time. While there...I ended the terrible terrible English drought, beginning with rain the first day that I appeared at the Conference...and ending with English towns so flooded that boats were necessary to navigate the streets. While addressing the scientists present, I informed them that I would end the drought...which brought many laughs, since there had been no appreciable rain for months and the English weather experts were projecting no rain for more months to come. Well, I confounded the Weather Experts in England by bringing prodigious rains to England which did indeed end the horrible drought prevalent there. And my "UFO connection" brought it about.

Perhaps it is superfluous to add...that I am the only human being in existence who can do what I can do.

My brain is half-alien...it has been modified several times by the UFOs...so that I am half-human and half-alien. For years I have been able, telepathically, to communicate with UFOs, and they with me, directly. For cause-and-effect results that could be documented by scientists. On several occasions I have produced UFOs for scientists, under specific conditions, and it is documented. You can check with Dr. Max Fogel, Research Scientist for Mensa, Sumneytown Pike, Gwynedd, Pennsylvania, 19436...I produced a UFO specifically over the heads of policemen in a certain area of Virginia within a certain time limit...called in advance to Dr. Fogel. I have his affidavit. I have done the same thing with other scientists but we will leave it at that. Am enclosing a few things which will generally explain what I can do...and it is all documented.

Here is my proposition: send me \$3,000 in U.S. money. I will then go to work to provide you with what I have outlined above, within the time limit set. Also, I will come to London about the 1st of September with my two children, carrying some excellent documentation that you will enjoy seeing. If you would like for me to lecture for you at that time, I will be delighted to do so, at no charge. And just perhaps...you would be interested in participating in my "UFO safari" at that time (see enclosed letter.) To accompany me...on this peculiar safari...would, I think, be one of the highlights of your entire life. Adventuresome.

Perhaps you know my friend Arthur Shuttlewood, 17 Portway, Warminster, England. Or, Ronnie Petrie, 10 Oldtown Place, Hilton, Inverness, Scotland, Phone 36400 office or 38518, home...Ronnie drove me to my rendezvous with UFOs and the Loch Ness creature. Or Eric Romaine, 41 Water's Road, Salisbury, England, Phone 3120... Eric drove me on some of the adventures. Or, Peter Wilson, ex-Sergeant-Major of the English army, Highland Craft Centre, Drumnadrochit, Inverness Shire, Scotland,

Deffney
Scientists... you will see from this file that what I told Mr Wilson I could do, June 14, 1977, has been brought about as this entire file describes (but for a different season).
