Vancouver WASH 98665
U.S.A.

Dear Mr Owens,

Having despatched a letter of request to you this day in which I sought your aid in dispersing this drought which covers New South Wales (one of the states of Australia) and, indeed, most of the Australian continent, I now send some news-cuttings in confirmation.

Yes, Mr Owens there is a drought and your help is needed to bring drought-breaking rains and good follow-up rains.

I hope you give your human choice and permission.

Thank You

But for many graziers this will soon become financially impossible — it would cost $650 to hand feed a cow for six months.

Affected areas

Many farmers are slaughtering stock and this number will soon spiral.

average, with half of these on agistment in Queensland since mid-1979. The rest are foraging in the scrub for feed.

WALGETT has been a drought area since last May. It has not known a good rainfall since December 1978.

Farmers say their stock is already weak and will

Most dams are almost dry and even if good rain came now there would be no suitable winter growth of fodder — only green shoots full of water.

YASS had some rain in February but it was patchy and missed many properties.

There is little feed and hay and grain is very expensive.

BEGA's dairy production is slipping.

There was a big storm in January but the rain was so heavy that most of it ran off the land and only a fraction soaked into the soil.

HILLSTON has not had a good rainfall for about three years.

Most properties still

Dear Sir,

You have been given the mind of "future man" to help the human race if possible. The S.I. have made you their only link with the human race so that the S.I. can step in and help the human race with your human choice and permission.

Would you please consider helping to relieve the drought in Australia? If the size of Australia is too big to contemplate, please consider relieving the drought for say a tenth of the area for a start.

How about starting on the northern tablelands and north coast of the state of (New South Wales)? Would you please consider helping to relieve the drought in these areas? Thank You.

Do you want me to send you any newspaper articles to confirm the drought and the breaking of the drought if you agree to consider bringing this relief?

Best wishes

Yours faithfully

Bruce Kell

P.S. $10 enclosed with thanks BK

Note, Br Mirkhave:
Mr Kell asks for rains on New South Wales... and more specifically (see his ltr of April 3 enclosed) on Armidale & Kempsey.
I got it done; Ted.
See enclosed.

Dear Ted,

Thank you for the UFO Diac and the thoughtful inclusion of magazine material and copy of letter to the P.M. concerning the Australia-wide drought.

The P.M.'s name is MALCOLM FRASER. He has often been quoted as the originator of the phrase « LIFE WASN'T MEANT TO BE EASY » and being a farmer-grazier-rancher-cattleman as well as academically qualified, he should appreciate the vagaries of nature especially lack of rain. However he could not send public money.

I had no idea you would approach him personally.

By the way the full version of the above quotation is from George Bernard Shaw:

« LIFE IS NOT MEANT TO BE EASY MY CHILD
BUT TAKE COURAGE
IT CAN BE DELIGHTFUL »

So please, Ted, use my small contributions towards bringing rain to Australia, especially those parts of New South Wales which include Armidale (northern Tablelands) and KEMPSEY (the North Coast of N.S.W.)

I am aware that help is needed for your work and research and I am aware that should you place my photo on your Healing Wall, any healing would be maximised.

However my first thought and object in contacting you, was to ask assistance and intercession to bring rain to this parched continent of Australia. I doubt if you would respect me very much if I now choose to dump Australia and concentrate on my own personal needs.

Additionally I know you have advertised a course for $50 so I feel I could take this course personally (plus extra for say $20 AIR MAIL postage). total . - - - - - - - - $ 70

Maybe I could include a donation which could be halved as being towards ++
drought relief of Australia $ 100

Dear Mr. OWENS, Revered Sir,

I should have some further visual aids before the end of the month but I wondered if you care to view the enclosed chart as soon as possible because of the immediate relevance of the figures in a time-wise sense.

There is no doubt that two cities mentioned in a previous note, have been placed just outside the area of serious rainfall deficiency.

Thank you for your continued interest and for retaining your objectives . With best wishes to yourself and your auspicious friendship

Dear Mr Owens, Revered Sir,

Unfortunately there is a hold up in preparation of the Monthly Weather Review for New South Wales for May 1980.

However, I enclose the M.W.R. for N.S.W. for April 1980 together with some rainfall maps for Australia (April also) and a rainfall deficiency map for South-East Australia.

The latter map I have already forwarded to you under separate cover.

Once again I thank you for your continued interest, with best wishes for yourself and your auspicious friendship.

18th June 1980

Dear Mr. Owens, Revered Sir,

I enclose two more rainfall maps prepared at the BUREAU OF METEOROLOGY and I hope they are suitable for your research purposes.

Thank you for your thoughtful enclosures with your recent letters. The prospects which open before you are certainly scintillating, interesting and exciting.

Unfortunately, the publishers HARCOURT, BRACE representative in Australia says that Earth's Ambassador is not listed in the 1980 catalogue. I shall write direct to Dr. Jeffrey Mishlove for a copy unless the local rep. is able to find it in a supplement to his normal catalogue. Thank you again.

We have been distressed to learn of the devastation caused by the exploding volcano Mount St Helens. Our T.V. newsprogram showed the volcanic ash settling like dirty snow over the city of Portland. OR but fortunately some rain helped to wash the ash away.

Again , best wishes to yourself and your auspicious friendship,

Bruce Kell

June 24, 1980

Dear Bruce:

Let us not stand on formality. I will call you Bruce; you call me Ted.

Thank you very much for the $40 that I received today to help in my work. (What I really need is about a thousand a month for a year, to do what I have to do. What Australia needs is a vast amount of rains, everywhere; what I need are the monies to keep on bringing the rains to Australia.* But I realize that of course you could not supply that; it is a pity that the country of Australia, somehow, could not.)

The information that you have just sent re the month of April (the official reports) is excellent; superb. Thank you so much. Do try and secure much the same for May, if and when you can, all right?

Now with regard to the book that the scientist has written. Not long ago the Editor of which Mr. D. Scott Rogo and Dr. Mishlove informed me that Harcourt Brace, [redacted] had wanted the book very much) and given them an advance of $5,000 to write it...had had their Editor resign, and a new Editor was hired...who negated the book and took half of the advance monies back. So the scientists now have the book in the hands of two other publishing houses in order to have it published. I have a complete copy of the book in ms. form, and it is a marvelous work...a scientific, critical evaluation of ten years of my work under the observation of scientists. Since no one else in human history (after biblical times) has been able to perform what I can do and document it satisfactorily with scientists...the book, naturally, is one of a kind. Never one before like it, and there will never be another like it. It is possible that Dr. Mishlove might furnish you with a copy of the manuscript, if you covered the expense of xeroxing it, postage, etc. It runs to about 300 pages, I believe, and is very big and heavy.

There is no need to be "distressed" about Mt. St. Helens. It is one of my demonstrations (negative) to pressure the U.S. Government into providing me with a base* so that I can do the kind of work that I want to, around the world, from that secure base. (Other negative demonstrations are also at work.) Years ago I gave a positive demonstration with a volcano in Sicily...Mt. Aetna...stopping it and saving the villages on its side from lava flow. Yes, much ash has fallen onto Portland and onto my city, Vancouver, which is [redacted] to Portland. My family and myself all wear special NIOSH TC-23 masks outside in order to filter out the microscopic silica contained within the ash which fills the air. (About 70%-80% silica; tiny, microscopic"knives"which the lungs cannot expel once inhaled and which will chop up the lungs on the inside within 3-5 years time ahead.

My last giant demonstration was to control the State of Florida (Miami, etc.,) for one complete year. For information about that you can write to an Air Force weather expert who observed the demonstration from beginning to end and who is writing a book about it. His name is: Mr. Wayne Grover, 3282 Parade Pl., Lantana, Florida, 33462. You can tell him that now I am doing with you what I did with him...except this time I am controlling an entire continent instead of just a State in the U.S. My work in controlling Florida is discussed in length in "Earth's Ambassador" by Dr. Mishlove and Rogo, incidentally.

* which will cost 2-5 million dollars (also covering my expenses for 5 years to get the "world" job done.

It occurs to me that perhaps I should go into the methodology that I am using to bring about the results that I am bringing, [redacted] and will bring, [redacted] onto Australia...vast amounts of rain. Floods, most probably, overall, but that cannot be helped. [redacted]

You, Bruce, are my "forward artillery observer" in Australia. As you know, in a war someone often must sneak through enemy lines with a radio, find enemy artillery, and radio back the position of the artillery so that his own side can then shoot missiles, cannon, etc., in order to eliminate the enemy artillery. You are my eyes and ears in Australia, and you "radio" me via your maps and information so that I can do my work.
I, in turn, am the "forward artillery observer" for the UFOs that I work with and for...and have for long years, documented with scientists. (This, too, is discussed at length in "Earth's Ambassador".) It is my duty to use a "PK Map" of Australia, (crudely drawn, it is true;) utilizing the psi-force symbols to be placed into action each day by my UFOs. Each day I "activate" this special map of Australia,...that is, putting the psi-force into action mentally...and telepathing the whole thing to my UFOs...who then make the necessary weather changes for Australia to bring rains [redacted] (that is why UFOs were seen there recently.) Close liason, therefore, is necessary between myself and my UFOs. Joining us in this is The Mayan Power, Xtolac, with whom I just recently made contact in Yucatan, for the first time...being guided by my UFOs to the right place to do so and instructed by them in just how to go about it safely.

You make inquiry about The Egyptian Power, "PyrCre"...short for Pyramid Creature. This is a living entity...invisible, true, but so are X-rays and they can also be deadly. It was placed in the Giza Valley area ages ago by my UFOs in order to guard the key pyramids and temples in the area. Not from robbery of gold, silver and jewels...but to guard the pricelessswisdom and knowledge left there for those to come with an alien brain who know how to "tap" these "libraries" of infinite knowledge. My UFOs took me there, to the "key" places, and instructed me in how to link up with the tremendous living entity there (its name is not really PyrCre, but I am not allowed to divulge the real one...so it must be called PyrCre). Also I was given an encapsulated "dose" of the priceless wisdom, knowledge and understanding...which slowly unfolds in my mind as time passes and as my half-human, half-alien brain is able to absorb it safely.

I hope that the above gives you a bit of insight into the giant picture of which the majority of humans would only be able to see a tiny corner of. (Improper English, but correct thought.)

Respectfully,

Ted Owens (PK Man)

16th May 1980

Dear Ted,

I enclose some newsclippings reference the breaking of the drought in certain parts of Australia, in particular the north coast and the northern tablelands for which I specifically asked your help. Thank You.

Please understand the need for "follow up" rain.

I have not heard from you since sending a bank check on April 30th. Perhaps I shall enclose S.A.E. with this short note. (AIR MAIL is always expedient)

Thank you for the UFO Disc. (I sent $10 to Western Research Center but perhaps it went astray.)

Trusting you are keeping well and enjoying life

Yours faithfully,

Bruce.

Dear Jed,

Yes. You have shown what you can do for one part of Australia and I have already forwarded to you by AIR MAIL, documentary ie. newspaper evidence of ending the drought for those specified areas.

I now enclose some more drought clippings for areas which have not received your considerable attention, with the plea "NEXT PLEASE?"

Thank You for listening to my plea and prayers.

With best wishes

yours faithfully,

Bruce Kell.
