

March 16, 1978

Jeffrey Mishlove.....today my landlord sent me a note, and I quote:
Mr. Owens, I got the utilities yesterday...they have gone up so much
to the point that I have to go up on your rent. I can no longer afford
to pay these high prices without increasing the rent...it's costing
me like it is I'm going in the hole so when your rent comes due it will
be \$250.00 per month starting April 5th. I wanted to tell you in
plenty of time to think about if you disagree, please let me know.

Signed, Mrs. R. A. Longley.

All right. We are already paying \$195.00 per month for a broken down
trailer in which almost nothing works. The leg falls off our kitchen
table; the light switch to our kitchen failed some time ago; we have
about 15 windows in this mobilehome...and only two windows function;
that is, will open. It is strictly a "mickey-mouse" mobilehome, where
little if anything is solid or sorks. I would estimate that the rent
here, at the most, should be \$95.00 per month. They are now charging
us \$250.00 per month. Which, of course, we cannot pay. They are
trying to force us to move. (We have no car, and no thousands to move,
and the dam Longleys know this.)

Before we moved here...the outfit in Albuquerque warned us...that
places are very hard to rent here...and the common ploy of rentors
is to let the rentees in for a while, and get committed...then raise
their rent sky-high...and get rich, on a "nothing, i.e., cheap,
investment." Which is exactly what my rentors have done.

But it goes even further. Only a week ago our landlady (a neurotic
religious fanatic who speaks in voices in her nutty church...linked
with Texas Baptists) bawled me out because of imagined things my kids
had done around here. Believe me, she is nuttier than a fruit cake.
She also thinks that I work for the Devil...because I am linked with
UFOs. So she is trying to get rid of us.

Now, on two occasions her son, David, has come to my mobilehome at
night. He is in his twenties; has done jail time; his wife has left
him with their two kids...and first, he asked me if he could borrow a
pistol, so that he could go and shoot somebody at a bar nearby. Of
course, I refused. The second time, he came in and told me that his
father and mother, the Longleys, were "planning the worst for me.
Were going to do something real bad to me." This was two weeks ago.
They, of course, don't know their son came to our mobilehome next door,
drunk, while they were gone.

To sum up: we have no way of getting up \$800 per month, which this
will now require. In a broken-down mobilehome in a crime-ridden
area. This can only mean...that the SIs will get even..."as I go,
so goes the United States" according to the SIs.

Well now...refer to your letter of Feb. 8, 1978: "If you think that this (referring to experiments involving biological materials, radioactive decay, and effects on major pieces of equipment such as a cyclotron) is possible, I have a chance to raise some funds to get things going. Perhaps something like \$500 a month or so for you and your family for several months. We could also get you out of New Mexico and back to California in a better environment. Meanwhile we can still keep working towards the base in Oregon."

Because of the situation that has arisen here, I am forced by circumstances beyond my control...to accept the above proposition.

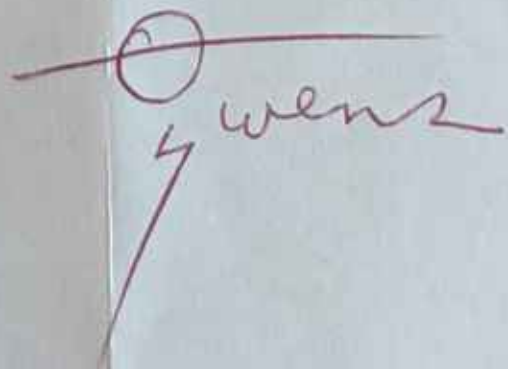

I have agreed here to pay these lousy people one more rent payment on April 5, for \$250. Then after that we are free to go. But how do we get there? I have no car, and we have a big load of stuff to cart along...probably need a Ryder truck to put it in and drive it over there. Would have to send Martha, my wife, by airplane, and she can stay with Millie a bit until the kids and I get over there and get unloaded wherever we are going to stay. And...where would we stay there? (Martha, you know, is over five months pregnant and couldn't stand a long bus ride or truck trip at this stage of her pregnancy.)

One other thing, Jeffrey...I know this sounds silly...but if you-all could pull strings and get me on "Match Game", a TV show in Hollywood, I reckon it is...I could win us anywhere from ten to twenty thousand dollars. The show depends a great deal on precog and telepathy, honestly...and at home I call the correct answers 95% of the time. Oh yes...and IQ is important on that game, also.

Anyway...there it is. Deal me into the game, and it's go, on the experiments.

Best to you,

Ted Owens (PK Man)

Jeffrey Mishlove

Dear Jeffrey:

Last Tuesday night I called Millie and asked her to pass on to you information (because I called you first and could not get you)... to the effect that the SIs would cause a calamity in California within hours or days, or weeks at the most. Between then and now... there have been three spectacular airplane crashes in California... the DC-10, the F-105 that exploded, and the prisoner plane. If you are not familiar with these, check with Millie. The DC-10 crash alone was so spectacular as far as news goes...that it was highlighted here on our New Mexico TV stations. This leads me to believe that the SIs will now begin concentrating on "air space" over the United States, as compared with their former weather demonstrations and fire demonstrat.

Remember...there would be no present war between the UFOs and the US if their one single link with the human race, myself, had been given the Oregon Base money, as they wish.

At any rate...today they communicated with me again...to say that if I have not been given the Oregon Base money within 90 days...they, the UFOs, will "meld" or bring together all toxic, radioactive, you name it debris circling up around our globe, our earth...plus *some* satellites...and guide the entire mess down onto the United States! (Please bear in mind that this is not my idea; nor of my doing.) Furthermore, to underscore this letter...they will produce a massive supernatural sign in the skies over the United States within 90 days! For all to see.

Contrary to other opinions, Jeffrey...I do not believe that the nuclear satellite that crashed down onto Canada...was engineered by Russia, or by something "defective". I believe that the SIs, with their current "war" with the US, engineered it. Trying to hit the US.

Just in case you are not aware of it, my friend...you and I are in a no-limit game...the likes of which have not been seen since the last civilization vanished from the earth.

It isn't our game...it belongs to the UFOs...and if the human race prefers not to follow their instructions and advice (like the Oregon Base) then the human race may well vanish, at this point in time. And frankly, at this point...from where I'm looking...I couldn't care less.

Sincerely,

Ted Owens (PK Man)

Dear Jeffrey:

The first chapter arrived. Very good. A few minor changes might be in order, but on the whole...excellent.

I want to thank you...for being instrumental in getting me that \$300 from your friend, Oshai. I was down to something like three dollars when it came...so you can imagine...

Last night Sacramento had a major power failure...which followed the San Diego power failure couple of days ago...which followed the two major storms which cost Calif. \$150,000,000.00...which followed the three major plane crashes; DC-10; F-105 and prisoner plane...which followed my letter to you, and phone call to you, warning that the SIs were going to cause calamity in the hours, days and weeks coming up....

Henry was over last night. The dear soul presented me and my family with a beautiful, huge, brand-new TV set...to replace the set which was shotgunned out of existence some time ago. I tell you, Henry is something else. He mentioned you'd be coming April 6. You will certainly be welcome...will be good to see your mischevious and intelligent face again!

Sincerely,

Ted Owens (PK Man)

Jeffrey Mishlove

Early this afternoon I called Millie to pass on an urgent message to you. (I follow this procedure after first calling your other number, but do not wish to leave an important message on your recorder-phone arrangement.)

The SIs got through to me with surprising information: they have scratched their plan to implode materials from space surrounding earth down onto the U.S. on a 90-day time basis. This will not happen.

Instead... they are going to interfere with the spin of our earth, which will cause earthquakes, storms, floods, high tides and tidal waves, fires, lightning attacks, etc., all around the world.

They stress that the other countries of the world must be warned of this demonstration of UFO powers upon our earth, our world... so that the countries can be prepared to put out fires, deal with the results of volcanic upsets, quakes, and the like.

The SIs are not happy about "time" because in the past they have helped me produce many miracles...yet the scientific community has sneered, in effect, because it took a bit longer for the miracle to come about than I had called in advance. Instead of taking 90 days to end England's killer drought, for instance, it took me (and the UFOs) 120 days, I believe it was, without looking it up. Perhaps it took 150 days...but the UFOs and I got the job done, which was the main thing. So for this above world demonstration...they place no time limit on it whatsoever. The key to understanding that it is the UFOs at work will be...it will all happen relatively at once, that is...within the space of days, or a few weeks. Bang whop in one country; bang whop in another country; bang whop in another country, and so on. Accompanied by UFO appearances in those countries.

The SIs told me that my knowledge of them and of working with them for years, is priceless...and that my "brain of future man" which they have given me, is priceless. Because the U.S. has attached no importance to this priceless situation relating to myself...and seemingly will not do so, which would result in the Oregon Base and miraculous work done by myself with the UFOs after that in a constructive manner...then the SIs have decided to attempt to call the attention of the entire world to the "man with the brain of Future Man," and their modus operandi to do so will be the above-described plan on a world-wide scale.

I gather they will wait a bit, before putting the above plan into effect...to give other countries of the world a chance to be warned.

Summing up: the outer-space debris attack on the U.S. is off; will not happen. Instead, there will be a world-wide demonstration, as outlined above.
