

Articles and Notes

Appears to be mostly documents from 1972

The more I scanned these documents the more I realized how this blank folder was very valuable and needed to have a name attached. So I renamed it Articles and notes.

Many interesting documents besides just newspaper articles including a national enquirer article about Ted Owens and another article that is difficult to find the title page. Perhaps they are the same article? There was article about parapsychology in Europe written by Jefferey and at about two more articles that mentioned Ted Owens.
